

The Island Capsule

PEI College of Pharmacists

11/25/2016

Edition 2, Volume 45

CE Year Reminder

The PEI College of Pharmacists would like to remind pharmacists and technicians that the deadline for completing their CE requirements for renewal is February 28, 2016. Please ensure that your online Professional Development Log is complete by the deadline. Members are reminded that the PEI College of Pharmacists allowed members to carry over CEUs that were completed from January 1, 2016 to February 28, 2016 to the new CE year which began on March 1, 2016. This is a one-time carry over permitted this year only due to the transition to a new CE year. Please direct any questions you may have to the PEI College of Pharmacists office 902-628-3561 or info@pepharmacists.ca

MISSION

Regulating the practice of pharmacy in the province so as to promote a high standard and safeguard the welfare of the public with regard to pharmaceutical service.

Pharmacy Assistants Entering the Transition Pathway

Pharmacy assistants, currently working in pharmacies, who have entered or are entering the transition pathway to licensure, are reminded to complete and submit a [Pharmacy Technician Candidate form \(Intent to Register form\)](#) with the PEI College of Pharmacists. This form registers the applicant's work experience (2000 hours) as required for registration as a pharmacy technician through the transition pathway. Please contact the College office for more information.

November Health Product InfoWatch now available

The November issue of the Health Product InfoWatch published by Health Canada is now available. This publication is issued monthly in an easy to read format that includes a recap of health product advisories and summary safety reviews published in the previous month, as well as a growing selection of new health product safety information. The goal of the Health Product InfoWatch is to raise awareness and to provide clinically relevant information to healthcare professionals concerning marketed health products and their safety. In some cases, information is intended to stimulate reporting of similar adverse reactions.
